

"I put my prostheses to the test. Wearing them every day to work as a mechanic for grip, strength, and stability."

— Nick, four MCPDrivers

NAKED
PROSTHETICS

We offer three variations to accommodate different levels of amputation. However, all models restore fundamental grasps while utilizing your existing range of motion.

npdevices.com

75% of heavy manual laborers with partial-hand or finger amputations were unable to return to their jobs, with 26% of them leaving the workforce entirely.

It's all about
function.

Fully Custom

Each device is custom designed to within millimeters of a patient's unique amputation and hand structure.

We offer three custom-designed prostheses. The PIPDriver, MCPDriver, and ThumbDriver.
