

### PIPDriver™

Our devices are tested for a life equivalent of 3 years under normal wear and tear conditions. The patient should expect up to \$75 in serviceable consumables on the device per year, depending on use. These consumables include: rubber fingertips, shims, and touch up to coating. The **PIPDriver™** is covered under a one-year manufacturer's warranty, and extended warranties are available for purchase.

### MCPDriver™

Our devices are tested for a life equivalent of 5 years under normal wear and tear conditions. The patient should expect up to \$200 in serviceable consumables on the device per year, depending on use. These consumables include: rubber fingertips, suspension rings, shims, fairings, liner, and wrist straps. The **MCPDriver™** is covered under a one-year manufacturer's warranty, and extended warranties are available for purchase.

### ThumbDriver™

Our devices are tested for a life equivalent of 5 years under normal wear and tear conditions. The patient should expect up to \$200 in serviceable consumables on the device per year, depending on use. These consumables include: rubber fingertips, suspension rings, shims, fairings, liner, and wrist straps. The **ThumbDriver™** is covered under a one-year manufacturer's warranty, and extended warranties are available for purchase.

**Extended warranty** available for purchase at 13% of device cost for each additional year up two additional years.

**A second device** is available at a 10% discount which extends the manufacturer's warranty to two years on both devices. Many patients wish to have two sets of devices: one for the workplace, which is often hard on their devices, and one reserved for more formal occasions, such as church or a nice dinner. A second device also provides a backup for when service or repair is being performed.
